Footnotes:

- RX 560 and RX 590 require macOS 10.14.6+.
- Radeon VII requires macOS 10.14.6+ (to be mostly functional); or Windows 10 Build 20H2 with latest AMD drivers. The Radeon VII has a few anomalies under macOS and is not supported by AMD, Apple or Sonnet. In a Thunderbolt chassis, the Radeon VII fans run normally during operation, but during sleep or shutdown, the Radeon VII fans rev up to full speed, so the user must power down or unplug a Breakaway Box 650. This is an issue with the Radeon VII fan control firmware, and we do *not* expect an AMD update to fix this.
- Radeon RX 5500, 5500 XT, 5600, 5600 XT, 5700 and 5700 XT require macOS 10.15.7+ (Radeon 5500 and 5600 models may not identify correctly in macOS.)
Radeon RX 6800, 6800 XT and 6900 XT and Radeon Pro W6800 require macOS 11.6+.
Radeon RX 6600, 6600 XT require macOS 12.2+
- Under macOS 10.14.6, a 2018 Mac mini must be booted with a monitor connected to the Mac mini's HDMI port. If you have a Mac mini, you must either (a) Connect an HDMI display emulator plug to the Mac mini HDMI port and mirror displays; or (2) Connect a monitor to the Mac mini's HDMI port to log in, and then move the HDMI monitor connection to the eGPU. This issue has been resolved since macOS 10.15.7+.
- If you have File Vault turned on under macOS, then only the internal display or a display connected directly to the Mac will light until you have logged in.
- Breakaway Box maximum card size is 312mm x 160mm x 55mm. DuoModo eGPU maximum card size is 312mm x 140mm x 58mm. These cards do not fit one or both of these eGPU chassis.
- Sonnet Radeon 6800 XT and 6900 XT requires macOS 11.6+. USB-C port Supports Apple Pro Display XDR and other Thunderbolt Displays with macOS 12+.
- Starting with 30 series, some NVIDIA GPUs are using a 16-pin or 12-pin connector for power. Vendors are shipping an adapter with their cards that lets you plug into two-to-four 8-pin power connectors.
